

# ENERGY WISE

for your Business

## COMMERCIAL KITCHEN SAVINGS KIT

Covid 19 has had a significant impact on several businesses and the food service industry is no exception. The contents included in this kit can help you make some no cost changes that will provide savings to your business. Please complete and then return the installation form below to get a better understanding of the typical annual savings associated with the application of these measures and to quantify the expected energy saving impacts.

### Your kit contains:

- Refrigerator coil cleaning brush
- 4, 9W LED A19 bulbs
- 4, 1.0GPM faucet aerators

### Installation checklist (fill in all shaded areas below)

- Indicate your hot water heater type (electric or natural gas/propane)
- The quantity of each item installed
- Email copy of completed electronic form or scan/send picture of hard copy form to your local energy expert at your cooperative.

### Installation and Financial Summary

#### Hot water Heater Type (please select one)

Electric       Natural Gas / Propane

Quantity of installed aerators	# installed	Expected annual savings per installed item	Expected annual financial savings
Electric		X	
Gas		X	
Number of refrigeration coils cleaned*		X	
Location of LEDs installed	# installed		
Walk in freezer		X	
Walk in cooler		X	
General areas		X	

\*Save your coil brush and complete this task annually to maintain savings.

### CONTACT US

To learn more about additional food service related energy-saving and rebate opportunities for your business, please contact your local energy expert at your electric cooperative.
